

# Fix for Java Security Issues

If you are having trouble with viewing a specific site that has a later version of java, and you have java 8 or most current java, this fix should help you in resolving the issue.

## To fix the Java Security issue:

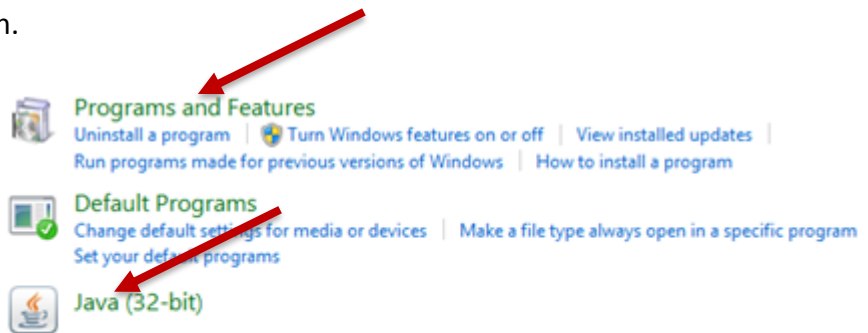

1. Open your **Control Panel**:
  - a. For Windows 8, right click on Window menu, and click on Control Panel.
  - b. For Windows 7 or older, click on Start menu, and click on Control Panel.

2. Click on **Programs**:

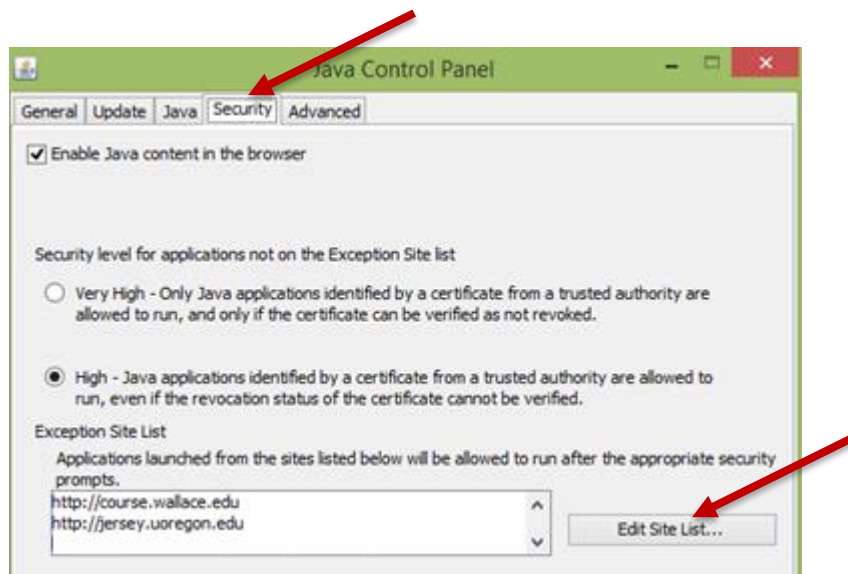

**Note:** if you do not see Java icon, go to Programs and Features to see if the icon appears there. If you do not see the icon in either place, you will need to install java.

3. Click on **Java** icon.

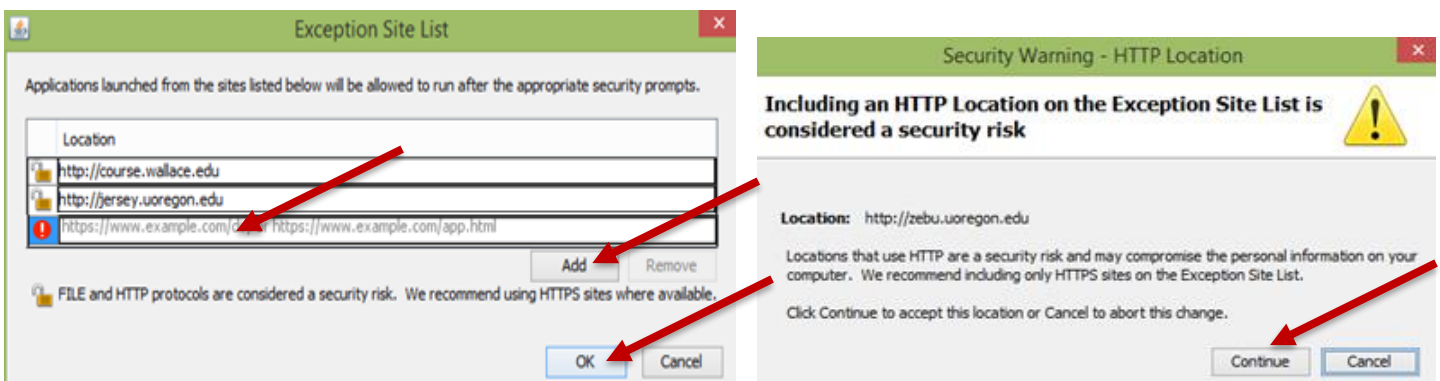

## Fix for Java Security Issues

- In the **Java Control Panel**, click on **Security** tab.
- Click on **Edit Site List**.

- Click on **Add**.
- Enter the following link below in the text box with the exclamation point:
  - <http://zebu.uoregon.edu>
- Click **Continue**.

- Continue clicking **Add** button and **Continue** button to enter the following links:
  - <http://zebu.uoregon.edu/nsf/cannon.html>
  - <http://jersey.uoregon.edu>
- Click **OK** and continue to click OK till you get back to your screen.
