

Adding Blackboard's SMS and Text-to-Voice Notifications to Mobile Device

Adding Blackboard's SMS and Text-to-Voice Notifications to your Mobile Device will allow you to keep informed about any updates that occur in your classes.

Please make a note that not all data received by SMS or Text-to-Voice will be delivered the same, so you will still need to check Blackboard for more information.

To setup the feature that will allow you to be notified by SMS and/or Text-to-voice phone call to your mobile device, do the following (Currently Blackboard will not notify you of Course Mail):

1. Click the down arrow by your **Name**, click on **Settings**, and click **Edit Notification Settings** link.

2. Click on **Courses I am taking** under **Bulk Edit Notification Settings** (or select individual courses from the **Edit Individual Course Settings** option).

Edit Notification Settings

 indicates settings have been changed from default values

» Edit General Settings

Define general notification settings, such as email format and reminder schedule, for courses and organizations.

» Edit Individual Course Settings

View the current notification settings for courses in which you are enrolled. Make changes to the notification settings for a specific course.
