**Subject:** Prof Dev Articles..  
**Attachments:** Undisciplined Thinking.pdf; Vulnerability & Success.pdf

I know each of you have been receiving weekly professional development articles sent to you by your Division Director. Most of these have been ACCS (Alabama Community College System) articles that keep you informed of what is going on around the state, as well as what other colleges are doing in response to the same issues we have here at Wallace. As a change of pace and in response to Director comments, the articles that will be sent over the next several weeks will come from periodicals. Most of these will have comments added to generate thought about how it applies to our initiative and challenges here at Wallace. These may also serve to facilitate collaboration among members of your division.

Attached you will find the articles for this week. If you get this before the weekend, I hope you *have* a good one!...if you get it after the weekend, I hope you *had* a good one!

Thank you all for the effort you have put into implementing more engaging learning activities in order to improve student learning and student success!...the positive effects are already showing in the course evaluation responses.
